About the Editors:

Jacques Berouty
Jacques Berouty received the Master degree from Paris & Marin Coute University, France, in 1987, and the Ph.D. degree in control and signal processing from Orsay University, France, in 1991. After positions at Telecom Paris University as a consultant and a member of the technical staff of Bell Laboratories, Murray Hill, Dr. Berouty joined the University of Quebec (PJM) in Montreal, Canada in May 2001 as a professor. His research interests are in signal processing, nonlinear signal processing, and multimedia communication.

M. M. Sondhi
M. Mohsen Sondhi is a consultant at Avaya Labs, Basking Ridge, New Jersey. Prior to joining Avaya for 19 years at Bell Labs, from where he retired in 2001. He holds undergraduate degrees in Physics and Electrical Communication Engineering, and S. and Ph. D. degrees in Electrical Engineering. At Bell Labs he conducted research in speech signal processing, echo cancellation, acoustic and speaker verification, speech recognition, artificial intelligence models for analysis and synthesis of speech and modeling of auditory and visual processing by humans.

Y. Huang
Yingfeng (Arden) Huang received the S. degree in 1985 from the University of Hong Kong, the M. and Ph.D. degrees from the Georgia Institute of Technology in 1990 and 1993, respectively, all in electrical and computer engineering. Upon graduation, he joined as a technical staff of Bell Laboratories as a member of technical staff in March 2001. His current research interests are in acoustic signal processing and multimedia communications.

Authorized desk reference
Quick access to applicable, reliable, and comprehensive knowledge

Springer Handbook of Speech Processing

Springer Handbook of Speech Processing

4. Perception of Speech and Sound

Each chapter comes with a summary and its own index for easy referencing to sections.

Chapter title and section headings

Easy to read and use: Includes more than 500 diagrams and illustrations drawn to scale.

One-column section headings

Clearly displayed math

Chapter and section title for easy navigation

Thumbnails identify the part and chapter sections

Perception of Speech and Sound

4.1.4 Binaural Hearing

...transinformation in the speech waveform that enter the listener's ear. The acoustical information available to the listener...
